

FEDERICO RODRÍGUEZ TORRES

GENERATIVE AI DEVELOPER · AI AGENTS · LLMS / RAG · CLOUD (AWS · AZURE)

Phone: +54 2954 407096 | Email: rodriguezfederico765@gmail.com
Portfolio: federico-rodriguez-torres.netlify.app | GitHub: github.com/optimizarai-del
Location: Santa Rosa, La Pampa, Argentina — remote / hybrid — open to relocating to Buenos Aires

SUMMARY

Developer focused on **Generative AI and agentic systems**. I build production AI agents with LLMs (**Claude**, **OpenAI**), Claude Code, **MCP** and function calling, integrating solutions in **Python (FastAPI)** and frameworks such as **LangChain / LangGraph**. Hands-on experience in Conversational AI / NLP (production WhatsApp bots), **RAG**, and hallucination-prevention techniques (grounding, guardrails, output validation), with **cloud deployment (AWS and Microsoft Azure)** using Docker containers and CI/CD. Backed by Data Science studies (EDA, machine learning) and **MLOps** practices to measure and iterate on agent performance. Self-taught, execution-driven, focused on shipping reliable, scalable AI products.

EXPERIENCE

AI Agents & Automation Developer — OPTIMIZAR (personal project) Jul 2025 — Present

Personal project · AI agents & process automation — federico-rodriguez-torres.netlify.app

- Design of **agentic workflows** with LLMs (Claude / OpenAI): function calling, tool orchestration and **MCP** servers; agents built with **LangChain / LangGraph**.
- Built **Conversational AI (NLP)**: production WhatsApp bots (SONNER / Babilonia) that autonomously handle most common queries without human intervention.
- Applied **anti-hallucination techniques**: grounding via RAG (embeddings + vector DB), re-ranking, output validation, guardrails and safe fallbacks for dependable answers.
- Cloud deployment (AWS and Microsoft Azure)**: services and agents in Docker containers with CI/CD, focused on availability, scalability and monitoring.
- Python integrations and automation (FastAPI, n8n) that cut manual work and response times.
- Heavy use of **Claude Code** as an agentic development environment (skills, hooks, sub-agents, MCP); full-stack platforms supporting the agents: React, FastAPI, PostgreSQL / Supabase, Docker.

Operations & Team Lead 2023 — 2024 · 2025

GUES

- Led a team of 10+ people, tracked targets and reported performance to management.
- Process improvement and daily problem-solving.

Sales & Customer Support Representative 2021 — 2023

Phone & in-person sales/support

- Customer support and issue resolution — practical grounding for conversational experience design.

SELECTED PROJECTS

- SONNER / Babilonia** — LLM + RAG WhatsApp agent with sub-agent routing and customer-facing guardrails. In production.
- Autonomous sales funnel** — multi-agent system (search, copywriting, orchestration, inbox) integrated with a CRM.
- CIUDAD / Trébol** — FastAPI + React platforms automating operations (scraping, importers, integrations).

TECHNICAL SKILLS

- | | | |
|----------------------------------|------------------------------------|---|
| ▶ LLMs (Claude, OpenAI) | ▶ AI agents / agentic workflows | ▶ Claude Code |
| ▶ MCP (Model Context Protocol) | ▶ Function calling / tools | ▶ RAG / embeddings |
| ▶ LangChain / LangGraph | ▶ Prompt engineering | ▶ Hallucination prevention / guardrails |
| ▶ Vector DB (pgvector, Pinecone) | ▶ LLM evaluation (LLM-as-judge) | ▶ NLP / Conversational AI |
| ▶ Python | ▶ FastAPI | ▶ n8n (automation) |
| ▶ AWS | ▶ Microsoft Azure | ▶ Docker / CI/CD |
| ▶ MLOps / model deployment | ▶ System design (scalable systems) | ▶ SQL / PostgreSQL / Supabase |
| ▶ React | ▶ EDA / data analysis | ▶ Responsible AI · chatbot metrics |

EDUCATION

University Technical Degree in Data Science In progress

Universidad Nacional de Chilecito (UNDEC) — Machine Learning, Neural Networks, EDA/Visualization, Databases (SQL/NoSQL)

Certifications in Problem Solving, SQL, REST APIs & JavaScript HackerRank

ADDITIONAL INFORMATION

- Languages**: Spanish (native) · English (B1/B2 — upper-intermediate, improving) · French (advanced)
- Availability**: immediate · remote or hybrid · open to relocating to Buenos Aires
- Profile**: self-taught, hands-on, focused on building reliable, scalable AI and continuous improvement.
